To Whom It May Concern:

As academicians, we know the importance of a strong educational foundation and the teacher's belief in their school and curriculum. Betton Hills Preparatory School provides all of this. For this reason, and others, our children have attended Betton beginning with the PreK-3 program. We have been so pleased with and excited about their progress.

Our daughter transferred to Betton in the middle of the school year into the PreK-3 program. The teachers and administrators were so welcoming and nurturing. While the transition was traumatic for us, it was uneventful for her. They were patient as she learned the policies and procedures of Betton Hills and were supportive of us as we learned their policies and procedures, too.

Our son began attending Betton Hills in the PreK-3 program, as well, and had the same teacher as our daughter. This was requested given the success we were and are continuing to experience with her. He is excelling, too, and is in Kindergarten currently reading at the fourth grade level. Needless to say, three years later, we are still at Betton Hills enjoying our children's academic success and the partnership between the teachers, staff, and us, the parents.

We also enjoy the Core Curriculum. While we do a lot of work with our children at home, we cannot deny the presence of the Betton Hills' faculty and staff. Our children's exposure to art, music, Spanish, and physical education truly enhances their academic experience creating a well-rounded child that is excited to attend school daily. Trying to explain why they are not going to school on Teacher Planning days is a welcome frustration when we understand that they simply want to be at school with their teachers and friends every day.

In summary, barring some unforeseen event, we will continue to invest in our children's academic success by letting them attend Betton Hills Preparatory School, knowing that the investment will pay off with academic success in college and hopefully, academic-based scholarships, too.

Sincerely,

Desi and Sonya Stephens
